

InvestorHub

PROJECT WORK LOGBOOK

Module: Platform Commission, Entry Fee & Admin Enhancements

Student Name: _____

Student ID: _____

Project: InvestorHub — Investor & Business Matching Platform

Technology: MERN Stack (MongoDB, Express, React, Node.js)

Duration: 11 September 2026 – 18 September 2026 (8 Days)

Supervisor: _____

DAY / DATE	ACTIVITIES	LEARNING (WHAT I LEARNED)
Day 1 Friday 11 Sep 2026	- Added a 10% platform commission on every investment (fee, net amount). - Showed the fee breakdown in the invest form, invoice page, and PDF. - Added commission revenue to admin analytics with MongoDB aggregation.	Learned fee calculation, safe rounding, and revenue reporting.
Day 2 Saturday 12 Sep 2026	- Built the admin user profile page with contact and verification sections. - Showed investor/business professional details with highlight tiles. - Displayed the NID image inline with role and status badges.	Learned to design review-friendly admin detail pages.
Day 3 Sunday 13 Sep 2026	- Added a confirmation modal before sending a match request. - Built a withdraw API (DELETE) so senders can cancel pending requests. - Synced the request state on the post page so it survives reloads.	Learned confirmation UX and clean state transitions.
Day 4 Monday 14 Sep 2026	- Built the user-facing report flow for listings and users. - Showed the reported target with direct links on the admin reports page. - Added the "reviewed" state and duplicate-report protection.	Learned to design a complete moderation pipeline.

DAY / DATE	ACTIVITIES	LEARNING (WHAT I LEARNED)
Day 5 Tuesday 15 Sep 2026	1. Diagnosed random logouts caused by the API rate limiter. 2. Raised the limit and added retries for transient auth failures. 3. Made post details reachable from My Posts (image, title, view button).	Learned to debug intermittent auth issues systematically.
Day 6 Wednesday 16 Sep 2026	1. Redesigned admin analytics with KPI tiles and health-rate cards. 2. Replaced bar lists with segmented proportion bars and legends. 3. Validated all chart colors for colorblind safety with a script.	Learned accessible data-visualization design principles.
Day 7 Thursday 17 Sep 2026	1. Built the BDT 100 registration entry fee with SSLCommerz. 2. Enforced the signup sequence: entry fee, NID upload, pending review. 3. Fixed the payment redirect port with CLIENT_URL and strictPort.	Learned to enforce multi-step onboarding flows.
Day 8 Friday 18 Sep 2026	1. Added entry-fee revenue tiles and a total platform revenue figure. 2. Built the admin entry-fees tab with search, filters, and pagination. 3. Locked fully funded posts against re-approval with a "Completed" filter.	Learned end-to-end revenue accounting for a platform.
